SUMMARY

A motivated and detail-oriented 300-level Computer Science student at Babcock University with a strong interest in web development, software development, and technology-driven problem-solving. Possesses foundational knowledge in web development and programming. Passionate about building efficient, user-centered applications, learning modern software development practices, and contributing effectively to innovative technical teams. Eager to gain practical experience, apply theoretical knowledge to real-world problems, and continuously improve technical skills in a professional environment.

EDUCATION

Babcock University

Bachelor of Science (B.Sc.) in Computer Science, Relevant

Coursework: Programming Fundamentals, Web

Development, Computer Programming (C++/Python),

Software Engineering Fundamentals

Expected Graduation: 2028

PROJECTS

Calculator Web Application | Technologies Used: HTML, CSS, JavaScript

- Developed a functional calculator web application capable of performing arithmetic operations, including addition, subtraction, multiplication, and division.
- Implemented interactive user input handling and dynamic result display using JavaScript.
- Designed a responsive and user-friendly interface using HTML and CSS.
- Added features such as clear, delete, and error handling for improved functionality.
- Error handling was also implemented to prevent invalid calculations from crashing the application.

Student Result & GPA Calculator | Technologies: HTML, CSS, JavaScript, jsPDF

- Developed a web-based academic grading system that calculates student grades based on input scores using a predefined grading scale (A–F).
- Built a GPA calculator that supports multiple courses, course units, and scores using a weighted grade point algorithm.
- Implemented dynamic result display using JavaScript DOM manipulation for real-time updates without page reload.
- Integrated jsPDF library to generate downloadable academic reports containing course details and GPA summary.
- Designed a responsive and mobile-friendly interface using CSS media queries for cross-device compatibility.

Personal Portfolio Website | Technologies: HTML, CSS, JavaScript

- Designed and developed a personal portfolio website to showcase skills, projects, and contact information.
- Implemented responsive layout and modern UI design for cross-device compatibility.
- Added interactive navigation and smooth scrolling for improved user experience.

TECHNICAL SKILLS

Programming Languages & Technologies: HTML, CSS, JavaScript, Python (Basic), Java (Basic), C++, Node.js (Basic)

Tools & Platforms: GitHub, VS Code

Areas of Interest: Software Development, Web Development, Cybersecurity, Problem Solving

INTERESTS

• Coding & Technology • Cybersecurity • Software Engineering

STRENGTHS

• Fast learner and adaptable • Strong willingness to learn new technologies • Good teamwork and communication skills
• Problem-solving mindset • Time management and responsibility

ACTIVITIES & LEARNING

• Continuously learning software development concepts and programming practices • Exploring modern web technologies and coding fundamentals • Building technical knowledge through coursework and independent learning
